

## Are your children caught up on their vaccines?

It's one of the best things you can do to protect them!

Immunizations protect kids and teens from measles, mumps, polio, whooping cough, flu and other dangerous illnesses.

### Now is the time!

Contact your pediatrician to schedule immunizations.

### Visiting is safe!

Pediatricians are being extra careful to keep families safe.

### It's very important not to skip or delay immunizations.

Your pediatrician can tell you which shots your children need.

### Vaccinations are required

by many schools, and often to participate in sports and other activities.

### Worried about cost?

The federally funded *Vaccines for Children Program* covers the cost of vaccines for those who qualify. For more info: [bit.ly/VFCProgram](https://bit.ly/VFCProgram)

### Is it hard for you to get to the doctor's office?

Call your pediatrician to find out if they have other ways to see your child.
